

Alarm Features

Thatcham Approved Cat 2-1	•
Utilises the Original Remote	•
Interior Ultrasonic Sensors	•
Bonnet Protection	•
Door Protection via CAN Bus	•
Ignition Protection	•
Tracking/Pager Output	•
Warning LED Receptacle	•
Alarm Trigger Memory	•
Indicators Flash on Sounding	•
Battery Backup Siren	•
Interior Sensor Exclusion via Gemini Remote or Touch key	•
848 Remote with Panic Button	•
Emergency Touch Key Override	•
Central Locking Outputs	•
Modular Unit	•
E Marked	•
Installer Selectable Arm/Disarm Tones	•
Up to 50 Additional Wireless Sensors can be added	•
2 Years Parts Warranty	•
938 Remote Control	Optional
7509 Wireless Contact	Optional
7709 Wireless PIR Sensor	Optional
807 Wireless Window Contact	Optional
259 Wireless Microwave Sensor	Optional

GEMINI MOTORHOME ALARM SYSTEMS

Thatcham Approved Cat 2-1

GEMINI
ALARM SYSTEMS

931TMH DUCATO CAMPER EURO V & VI (2011 ONWARDS) DEDICATED CAN BUS ALARM SYSTEM

PIR WIRELESS SENSOR

The PIR detects a change in heat energy within the habitation area of the motorhome when an intruder enters into its detection range (up to 10m²). It transmits this intrusion wirelessly to the alarm.

- Up to one year battery life (changeable).
- Low battery warning via internal buzzer.
- Can be isolated via the alarm for night time occupation.

ULTRASONIC INTERIOR SENSORS

The ultrasonic sensors saturate the front interior of the vehicle with ultrasonic waves and will detect when an intruder enters the front of the vehicle.

DEDICATED WIRING HARNESS AND FIXINGS

Dedicated installation kit for Fiat Ducato Euro V & VI chassis base vehicles.

- Vehicle connection harness.
- Siren and bonnet switch harness.
- Siren and bonnet switch mounting bracket.
- Universal fixing kit available for non Ducato based motor homes.

Gemini have more than 30 years experience in the field of vehicle security and tracking, all production conforms to ISO9001-2008 quality management systems.

GEMINI 931TMH CAN BUS ALARM

The Gemini 931TMH is based on our leading 931T CAN Bus Thatcham approved Cat 2-1 system with the addition of an internal receiver and additional central locking outputs. With these additions it allows the system to work with all our wireless sensors and allows a standard Gemini remote control to arm/disarm the system as well as operate the vehicle's central locking. (Ducato, Boxer, Relay and Daily normally come standard with one OEM remote control). As standard the system comes with front interior ultrasonic sensors, battery backup siren, door open detection via the vehicles CAN Bus system, bonnet detection, hazard lights flash when sounding and the Gemini remote control.

GEMINI 7590T2-1 ALARM

Available for non Can Bus applicable vehicles that utilises the same wireless sensors as the 931TMH alarm above.

REMOTE CONTROL

The Gemini remote control enables the system to be armed/disarmed whilst locking/unlocking the vehicles central locking, it also allows for the system to be armed and locked without the interior sensors activated.

TOUCH KEY/ RECEPTICAL

The touch key is used to override the system if the original vehicle remote battery goes flat. It is also used to deactivate the interior sensors when using the original vehicle remote to arm the system.

WIRELESS MAGNETIC CONTACT

WIRELESS CONTACT SWITCH

Wireless magnetic and contact switches for use on windows and doors

- Roof-light hatches
- Top boxes
- Garage compartments
- Lockers
- Replaceable Lithium Batteries
